The Systems Biology Center New York Summer Undergraduate Research Program at Icahn School of Medicine at Mount Sinai is a full-time 10-week research-intensive computational systems biology training program within laboratories affiliated with the Center.

WHO SHOULD APPLY:
- Undergraduates who are planning to pursue PhD or MD/PhD degree programs after graduation and who are interested in incorporating systems biology approaches into the research that they pursue.
- Students majoring in Biological, Mathematical, Physical and Engineering Sciences are encouraged to apply.

INDEPENDENT RESEARCH PROJECTS
- At the conclusion of the program, each student will present a poster summarizing their research project.

WEEKLY RESEARCH SEMINARS
- Seminars aimed at introducing projects which integrate experimental and computational components and incorporate a systems biology approach.

STIPEND FOR TRAINING PERIOD
- $4,000 stipend.
- Open to U.S. citizens and U.S. permanent residents.

June 6, 2016 – August 8, 2016

Deadline: March 7, 2016 at 11:00 PM Eastern Time
